

PROJECT MODULE 2 **NAME(s)** _____
DATABASE MANAGEMENT SYSTEMS
MAX 10 pt.

Remember all sections must be tabbed and labeled. Each row is a section.

Include most recently reviewed documents in the appropriate sections with the final documents. The reviewed documents are the ones I mark up and date. This will speed up grading. Make sure you make any changes specified on them before submission.

	Exists	Accuracy	Score Evaluation
Cover sheet for Mod 2 signed			Required
Grade sheet for Mod 2			Required
Cover sheet & grade sheet from Mod 1			Required
Module 1 as submitted including dividers			Required
Module 1 Revised			1 pt.
Module 2 Instructions			Required
Module 2 Business Rules			Required
Instance charts for each entity in the ERD.			4 pt.
DDL to create tables, describe on tables, select on constraints (printed with output)			4 pt.
DDL to create sequences, select on sequences (printed with output)			1 pt

Printed with output means you must run your commands and spool them so that the output goes to a file. It is the contents of the spooled file that I want printed and submitted.

Note: Missing “Required” sections of the module will result in up to a 1 pt. reduction from the module score.
